INDURAS
INDUSTRIAL ROPE ACCESS SERVICES

04-07-2014 *Blad 001**

Dear J. Lesciauskas,

I would like to inform you about the cooperation with Gridins enterprise LT from the previous 2 moths, on the PAWP wind farm project Ijmuiden Holland.

We 'INDURAS BV and C-Ventus BV' are very pleased to have Gridins enterprise LT on our side to make sure we provide a very high, quality, safe and good environmental standard as a team. All personal is sharp and aware of their own safety and that from others. Safety is the main activity of the job description on this PAWP wind farm, in the Netherlands.

Feed back from the client: very positive and have no comments on our way of working, all standards are very good and high. The confined space rescue drills have been well organized, from MP to Transfer vessel.

With this performance of Gridins we see good things for coming projects, and a long-term relationship.

Thank you very much, and also the guys in the field!

Maurits Schenk,

INDURAS

C-VENTUS representative.
