STATEMENT OF SERVICE

This is to confirm that during the recent years NKC Klaipeda has completed onboard our fleet several projects concerning class required UTM services for Class Renewal Surveys / Class intermediate surveys / Annual class surveys in connection with annual tank inspections, etc.

Messrs. NKC have shown their professional attitude and technical ability on each project. It can be stated that they have always shown high familiarity with class requirements regarding the necessary scope of work so that in the end a smooth and comprehensive job and cooperation between Owners, Class and NKC Representatives has been achieved.

With best regards,

For AJ Ship Management GmbH

Björn Bijma

Superintendent
