To whom it may concern

Dear Sirs

This is to state, that DFDS Lisco had several occasions, when Ultrasonic Thickness Measurement (UTM) works on our Ro-Pax ferries have been ordered to UAB "Klaipedos NK Centras" over the period 2008 – 2009 years.
We have to admit, that all our expectations and requirements towards quality and timing of UTM works and further reporting to Classification Society have been complied with.
Messers NKC have shown their professional approach to duties, responsibility to us as customer and solid understanding of specific aspects of UTM in relation to classification of the vessel.

Truly yours,

Igor Fokin
Head of technical superintendent department
