TRAINING
CENTER

CUSTOMER:

TEO LT, AB

is the largest integrated telecommunication, IT and television services provider in Lithuania. The TEO Group is a part of the TeliaSonera Group, a telecommunication company.

At the Gridin's Group International Training Center (ITC), informal training is organized and conducted on a regular basis according to various informal training programmes dedicated to the safety of work carried out at height. Specialists of the TEO LT, AB telecommunication services company underwent training according to one of these informal training programmes called "Basics of Carrying out Work at Height for a Worker".

INFORMAL TRAINING

INTERNATIONAL TRAINING CENTER

The company engineers and telecommunication specialists are supposed to ensure the impeccable operation of the Internet, data transmission, fixed-line telephone communication and television. During the installation and maintenance of state-of-the-art telecommunication equipment in the various places of a facility, specialists must comply with the safety requirements.

During the training of TEO LT, AB specialists, special attention was given to the following issues:

- work safety and health requirements;
- personal protection equipment, its intended purpose, usage, maintenance and inspection;
- special features of high-riggers' work and work organization;
- execution of simple rescue operations.

With regards to the selected (simulated) work situation, practical training was conducted on special high-rise structures, with the certified high-rise work manager participating. The training was devoted to issues regarding safe ascent and descent to the workplace at height as well as the carrying out of various operations at height.
