INDUSTRIAL PIPING SYSTEMS

ISO 9001
ISO 14001
ISO 18001

GRIDIN'S GROUP INTRODUCES A PARTNER - EXPERT IN PRODUCTION OF INDUSTRIAL PIPING SYSTEMS

THE MAIN ACTIVITY AREAS ARE:

- Food industry
- Heat production and supply industry
- Shipbuilding industry
- Electricity generation industry
- Gas supply/distribution industry
- Chemical industry

CUSTOMERS:

SC "ORLEN Lietuva", ORLEN Wir Sp.Z.o.o., ORLEN Automatyka Sp.zo.o., JSC "Baltic Bioenergy", JSC "Lokio bravoras", SC "Amilina", SC "Biofuture" Code-a-weld (Great Yarmouth) Limited, Borealis Polymers Oy.

Company operates **3000 sq.m.** fully equipped production area in Mazeikiai.

ISO 9001:2008, ISO 14001:2004, ISO 18001:2004, ISO 18001:2007, ISO 3834.

SERVICES:

Installation, maintenance and servicing of static equipment:

- Piping systems;
- Vessels, tanks;
- Process towers, reactors;
- Heating / cooling equipment;
- Industrial heaters, boilers.

RESURSAS

PIPING SYSTEMS:

- Fabrications of piping spools;
- Installation of new piping;
- Tests;
- Preparation of piping for inspection;
- Repair of existing piping;
- Non-destructive testing.

RESURSAS

PROJECTS:

JSC "Resursas" have successfully accomplished below listed projects and large scope works.

SC "Orlen Lietuva", Lithuania
Project "Light crude naphtha pipeline supply"

Executed works:

- Demolition of old pipelines and insulation;
- Installation of new pipelines and insulation, total length of installed pipeline – 5 km. Works were executed 25 meters above river on existing piping rack.

PROJECTS:

Borealis Polymers Oy, Finland
"Polypropylene plant dry end modification project"

Executed works:

- Pipeline dismantlement and installation (3 km) on pipe rack 10 m height;
- Equipment removal and installation, connecting piping installation (compressors, heat exchangers, tanks, elutriators, blowers, filters, blenders (2 pcs., 20.3 height, 10 t weight each);
- Material supply.

PROJECTS:

SC “Orlen Lietuva”, Lithuania
Project SC "ORLEN Lietuva" technological pipeline GD-01 and GD-02.

Executed works:

- Reinforced concrete retaining structures restoration;
- Steel structures, pipeline and equipment fabrication, mounting and installation;
- Measuring, testing works.

RESURSAS

RECENT PROJECT:

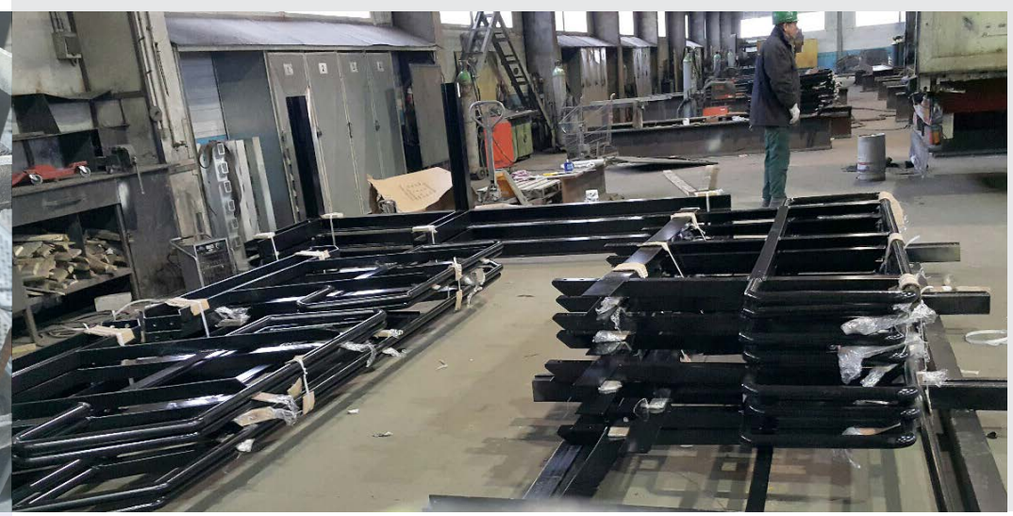

CDU project - its EPC

engineering, procurement, construction and contains mechanical, civil, electric, instrument works.

Scope of work :

1. Engineering (Mechanical design, Civil design, Instrument design, Electrical design) and supervision.
2. Material supply and purchasing.
3. Dismantling / demolition works.
4 Erection / installation.
5. Documentation and start-up.

RESURSAS

PROJECTS:

The Sodra Cell Expansion project in Sweeden for Valmet.

Main project parts are as follows:

1. Stainless steel Grade 316 and 304 piping - 135 tons
2. SMO piping - 1 ton
3. Titanium Grade 2 piping - 2 tons
4. Conventional carbon steel piping - 4 tons
5. Duplex piping - 7 tons
6. FRP piping (plastic piping) - 20 tons
7. Stainless steel secondary supports - 77 tons
8. Carbon steel secondary supports - 5 tons
9. Primary supports - 42 tons
10. Logistics

Project consist of prefabrication of piping and steel structures as well as installation on site.
